PROFESSIONAL SUMMARY

I build AI-native products that scale, from **LLM + RAG systems and autonomous agents** to production voice assistants at scale. I operate at the intersection of deep technical fluency, cross-org influence and commercial product thinking. With **9 years** across **B2B SaaS, consumer growth and global marketplaces**, I have a track record of **triple-digit ARR growth, enterprise AI adoption and partner integrations** across UK, US and India. India's Top 30 Under 30.

SKILLS

- **Product Leadership:** Strategy & Roadmaps · OKRs · Stakeholder Management · Cross-Functional Leadership · B2B SaaS · Marketplaces · Subscription Models · AI Product Strategy
- **Growth & Analytics:** Referrals & Viral Loops · Acquisition & Retention Funnels · A/B Testing · KPI Design · SQL · Mixpanel · Google Analytics · User Research · AI Product Metrics (LLM adoption, agent usage, automation ROI)
- **Execution & Technical:** RAG Workflows · LLM APIs (OpenAI, Anthropic) · AI Agents & Autonomous Systems · Prompt Engineering · Conversational UX · Voice AI (Twilio, ElevenLabs) · AI Evaluation & Monitoring · MCP · A2A Protocols · Claude Code · Cursor · V0 · Lovable · API-first Mindset · Webhooks · Data Pipelines · Partner Integrations · CSV Imports · Agile/Scrum · JIRA · Figma · Miro · GitLab · Postman · UserTesting
- **Domains:** Workforce Management · eCommerce & Omnichannel · Consumer Marketplaces · Mobility · Enterprise B2B SaaS · AI-native Products · Agentic Systems · Payments & Compliance · Global Product Launches (UK, US, India)

RELEVANT EXPERIENCE

Senior Product Manager - WFM SaaS Platform

Indeed, UK | July 2022 - Aug 2025

Owned product strategy and execution across Messaging, Support, Time & Attendance, Ratings, and Compliance, delivering AI-powered workflows and enterprise integrations that drove adoption across UK & US clients.

- **Launched 1:1 and Group Messaging** for clients and internal workforces, increasing message volume by **65%** and eliminating reliance on external tools.
- Scoped **AI-driven enhancements** including conversation summarisation, smart replies, and urgent action triggers, empowering enterprise clients to act faster and **reduce manual workload by 40%**.
- **Architected and shipped Alma, an AI Copilot agent** using LLMs + enterprise data (RAG) to automate multi-step shift tasks like worker scheduling, availability checks, and rota updates.
- Designed **conversational flows with entity resolution, context-aware reasoning and AI evaluation frameworks**, reducing manual scheduling workload for enterprise clients.
- Defined and delivered a **partner integration solution for OCS, a £400M enterprise client**, enabling real-time worker certification data to flow directly into their platform and improving transparency, trust and operational efficiency.
- **Delivered critical time & pay compliance features** that enabled **4,300+ sick pay hours** to be withdrawn and raised instant pay eligibility by **4%**, strengthening enterprise compliance and worker retention.
- **Redesigned the full clock-in/out flow**, improving accuracy by **30% (UK)** and **19% (US)** through mandatory geolocation tracking, ensuring enterprise client compliance with work regulations and reducing payroll disputes.
- Increased shift feedback adoption from **37% to 60%** in the UK by launching a scalable ratings system, improving worker-job matching and boosting client satisfaction and repeat usage.
- Reduced Salesforce support tickets by **45%**, saving Account Managers **248+ hours/month**, by launching intuitive self-serve resolution flows that improved client efficiency, satisfaction, and transparency.
- Defined **SaaS data strategy** and delivered dashboards, enabling faster decisions for client and operations teams.
- Partnered with engineering and design leadership to streamline delivery using **AI-native prototyping** (Cursor, Claude Code, V0), cutting documentation time by **25%** and significantly boosting roadmap velocity.
- **Built the first client-facing API**, enabling real-time partner data sync via webhooks and data pipelines, supporting third-party integrations and laying the extensibility foundation for the platform.

- Mentored junior PMs and led cross-functional product reviews with senior leadership and external clients; established a **client research framework** adopted across the product team to standardise discovery, pain point mapping and opportunity sizing.
- Championed **AI-native delivery workflows** across the broader product org, influencing adoption of AI prototyping tools (Cursor, Claude Code) team-wide and contributing to cross-team roadmap prioritisation.

Senior Product Manager - Omnichannel Growth

Health & Glow, India | Apr 2019 - May 2022

Owned growth and engagement for India's leading beauty retail chain (165+ stores, 3M+ users). Scaled revenue, optimised funnels, and launched viral and retention-driven features.

- Delivered **ARR growth of +152%** by streamlining content and order workflows, scaling omnichannel capabilities, and unlocking operational efficiencies across 165+ stores.
- Drove **conversion uplift** through structured A/B testing of pricing displays, landing pages, and bundle personalisation, translating insights into scalable funnel improvements.
- Designed and launched **referral-style acquisition levers** (BNPL, bundles, subscriptions), boosting repeat usage, improving loyalty metrics, and reducing churn.
- Introduced **AI-powered personalisation** for recommendations and offers, increasing engagement and lifting average basket value by 17% across mobile and web.
- Implemented the **Order Split feature**, raising NPS by +3.5 points and enabling upsells, flexible fulfilment options, and greater customer satisfaction.
- Revamped **iOS, Android, and web UX** using journey mapping, funnel analysis, and experimentation frameworks, improving retention and lowering acquisition cost per user.
- Launched **omnichannel features** including same-day delivery, click & collect, digital assistant, and self-checkout, reducing drop-off rates by 10% across key customer journeys.
- Increased **funnel velocity** by embedding test-and-learn experimentation practices, driving faster iteration and improving speed-to-impact across growth initiatives.
- Partnered with **marketing and CRM** to create growth loops, integrating loyalty, promotions, and referral programs into acquisition funnels to strengthen lifetime value.
- Defined and tracked **growth KPIs** (activation, repeat rate, LTV/CAC), aligning data-driven insights with roadmap prioritisation and executive growth strategy.
- Mentored junior PMs and led product reviews with C-suite and external partners, driving alignment on growth strategy and ensuring consistent decision-making frameworks across the team.

Product Manager - Driver Mobile App

ZipGo, India | May 2018 - March 2019

- **Reduced rider no-shows by 40%** through geolocation tracking improvements and smart routing features.
- **Increased driver activation by 125%** by optimising onboarding flows and in-app nudges.

AI PROJECTS & CERTIFICATIONS

- **AI Chatbot with Database Integration:** Built using OpenAI API with live database connectivity and RAG-powered retrieval; improved self-serve resolution and reduced support escalations. palak-cloud-pm.github.io
- **Voice AI Assistant (Phone-callable):** Built with Twilio + ElevenLabs with RAG memory, context-aware entity resolution and smart human handoff; handled routine support calls autonomously.
- **Autonomous Job Search Agent:** End-to-end agentic system that monitors job boards, semantically matches roles and sends personalised alerts; built using MCP and A2A protocols.
- **AI Hair Health Diagnostic Quiz:** Mobile-first conversational diagnostic built solo with Claude Code; stages hair loss from user answers and delivers a personalised product recommendation.
- **Other:** AI Product Management Specialisation (Coursera) · Building Systems with ChatGPT API (DeepLearning.AI) · Intro to Generative AI (Google Cloud) · A/B Testing & Experimentation (Udemy)

EDUCATION

- **M.Tech & B.Tech, Ocean Engineering & Naval Architecture - Indian Institute of Technology (IIT) Kharagpur**
