PROFESSIONAL SUMMARY

AI-native product builder, not just a PM. I ship production AI systems myself: **LLM and RAG pipelines, autonomous agents**, multimodal analysis and phone-callable voice assistants, using Claude, Cursor and the agentic stack as my daily operating layer. **9 years** across **B2B SaaS, consumer growth and global marketplaces**, with a track record of **triple-digit ARR growth, enterprise AI adoption and partner integrations** across UK, US and India. India's Top 30 Under 30.

SKILLS

Product & Strategy: Build-not-brief execution · First-principles product strategy · Field-led discovery · End-to-end platform ownership · AI product strategy · Subscription & Retention · B2B SaaS · Marketplaces

Growth & Analytics: Referrals & Viral Loops · Acquisition & Retention Funnels · A/B Testing · KPI Design · SQL · Mixpanel · Google Analytics · User Research · AI Product Metrics (LLM adoption, agent usage, automation ROI)

Execution & Technical: RAG Workflows · LLM APIs (OpenAI, Anthropic, Gemini) · AI Agents & Autonomous Systems · Prompt Engineering · Conversational UX · Voice AI (Twilio, ElevenLabs) · AI Evaluation & Monitoring · MCP · A2A Protocols · Claude Code · Cursor · V0 · Lovable · API-first Mindset · Webhooks · Data Pipelines · Partner Integrations · Agile/Scrum · JIRA · Figma · Miro · GitLab · Postman

Domains: AI-native Products · Agentic Systems · Workforce Management · eCommerce & Omnichannel · Consumer Marketplaces · Mobility · Enterprise B2B SaaS · Payments & Compliance · Global Product Launches (UK, US, India)

RELEVANT EXPERIENCE

Growth Lead - D2C Mens Health

Man Matters (Mosaic Wellness), India | Apr 2026 - Present

Sole PM for a D2C men's health subscription brand where retention is the whole game. **Shipped 6 AI systems into production solo**, with no data team.

- Built a **consultation-call intelligence system** end to end: AssemblyAI transcription, Claude scoring every call across 5 dimensions, cross-referenced against 30-day reorders to turn raw audio into structured signal the team acts on weekly.
- Found 3 doctor behaviours (shedding warning, tapering timeline, 30-day follow-up) that lift **reorder rate by 14%** when present; shipped a doctor protocol and weekly compliance dashboard used in performance reviews.
- Designed and shipped **2 production voice agents** solo (delivery onboarding and day-35 retention), driving **+10% reorder rate** vs holdout control.
- Built a **multimodal hair-progress pipeline on Gemini** that scores monthly user photos and auto-triggers before-after campaign outreach, delivering **73% ROAS vs 59%** for other campaigns, with a Claude Code review loop that improves accuracy over time.
- Designed **referral and retention mechanics** from consultation-transcript signals, targeting high-LTV cohorts with incentive structures to drive peer acquisition and repeat purchasing.
- Surfaced the **skin-category expansion case** without running a survey, by mining consultation transcripts with Claude for unprompted skin questions concentrated in the high-LTV retained cohort.
- Shipped an **AI Q&A agent** for hair-health questions and moved on-site search from keyword to intent-based retrieval, lifting **search-to-conversion by 1.5%**.
- Run the full PM function on the **agentic stack** (PRDs, Jira, Mixpanel analysis, prototypes, research), outputting the work of a PM, analyst and junior developer as a **team of one**.

Senior Product Manager - WFM SaaS Platform

Indeed, UK | July 2022 - Aug 2025

Owned product strategy and execution across Messaging, Support, Time & Attendance, Ratings and Compliance, delivering AI-powered workflows and enterprise integrations that drove adoption across UK and US clients.

- Launched **1:1 and Group Messaging** for clients and internal workforces, increasing message volume by **65%** and eliminating reliance on external tools.
- Scoped **AI-driven enhancements** including conversation summarisation, smart replies and urgent action triggers, empowering enterprise clients to act faster and **reducing manual workload by 40%**.
- **Architected and shipped Alma, an AI Copilot agent** using LLMs plus enterprise data (RAG) to automate multi-step shift tasks like worker scheduling, availability checks and rota updates.
- Designed **conversational flows with entity resolution, context-aware reasoning and AI evaluation frameworks**, reducing manual scheduling workload for enterprise clients.

- Defined and delivered a **partner integration for OCS, a £400M enterprise client**, enabling real-time worker certification data to flow directly into their platform and improving transparency, trust and operational efficiency.
- **Delivered critical time and pay compliance features** that enabled **4,300+ sick pay hours** to be withdrawn and raised instant pay eligibility by **4%**, strengthening enterprise compliance and worker retention.
- **Redesigned the full clock-in/out flow**, improving accuracy by **30% (UK)** and **19% (US)** through mandatory geolocation tracking, ensuring compliance with work regulations and reducing payroll disputes.
- Increased shift feedback adoption from **37% to 60%** in the UK by launching a scalable ratings system, improving worker-job matching and boosting client satisfaction and repeat usage.
- Reduced Salesforce support tickets by **45%**, saving Account Managers **248+ hours/month**, by launching intuitive self-serve resolution flows that improved client efficiency, satisfaction and transparency.
- Defined **SaaS data strategy** and delivered dashboards, enabling faster decisions for client and operations teams.
- Partnered with engineering and design leadership to streamline delivery using **AI-native prototyping** (Cursor, Claude Code, V0), cutting documentation time by **25%** and boosting roadmap velocity.
- **Built the first client-facing API**, enabling real-time partner data sync via webhooks and data pipelines, supporting third-party integrations and laying the platform's extensibility foundation.
- Mentored junior PMs and led cross-functional product reviews with senior leadership and external clients; established a **client research framework** adopted across the product team to standardise discovery, pain-point mapping and opportunity sizing.
- Championed **AI-native delivery workflows** across the broader product org, driving team-wide adoption of AI prototyping tools (Cursor, Claude Code) and contributing to cross-team roadmap prioritisation.

Senior Product Manager - Growth & Retention

Health & Glow, India | Apr 2019 - May 2022

Owned growth and engagement for India's leading beauty retail chain (165+ stores, 3M+ users). Scaled revenue, optimised funnels and launched viral and retention-driven features.

- Delivered **ARR growth of +152%** over 3 years by scaling omnichannel capabilities and unlocking operational efficiencies across 165+ stores.
- **Designed and shipped referral program, subscription bundles and BNPL mechanics** that created stickiness and drove peer-to-peer acquisition, reducing churn and improving customer lifetime value.
- Built an **AI skin and hair diagnostic** (selfie plus lifestyle questions, personalised routine builder, third-party vision API), lifting repurchase rate by 15%.
- Introduced **AI-powered personalisation** for recommendations and offers, lifting average basket value by 17% across mobile and web.
- Launched **omnichannel features** (same-day delivery, click & collect, digital assistant, self-checkout), reducing drop-off by 10% across key journeys.
- Implemented the **Order Split feature**, raising NPS by +3.5 points and enabling upsells and flexible fulfilment.
- Drove **conversion uplift** through structured A/B testing of pricing displays, landing pages and bundle personalisation.

AI PROJECTS & CERTIFICATIONS

- PM Workflow Agents (Freelance, Ethos Nexus): Built an agent-native PM Inbox workflow on the Nexus platform that classifies and routes product requests across Gmail, Slack and Granola. Shipped and in paid use.
- AI Hair Health Diagnostic Quiz: Mobile-first conversational diagnostic built solo with Claude Code; stages hair loss from user answers and delivers a personalised product recommendation. palak-cloud-pm.github.io
- Voice AI Assistant (phone-callable): Built with Twilio plus ElevenLabs with RAG memory, context-aware entity resolution and smart human handoff; handles routine support calls autonomously.
- Autonomous Job Search Agent: End-to-end agentic system that monitors job boards, semantically matches roles and sends personalised alerts; built using MCP and A2A protocols.
- AI Chatbot with Database Integration: Built using OpenAI API with live database connectivity and RAG-powered retrieval; improved self-serve resolution and reduced support escalations.
- Other: AI Product Management Specialisation (Coursera) · Building Systems with ChatGPT API (DeepLearning.AI) · Intro to Generative AI (Google Cloud) · A/B Testing & Experimentation (Udemy)

EDUCATION

- **M.Tech & B.Tech**, Ocean Engineering & Naval Architecture - **Indian Institute of Technology (IIT) Kharagpur**
