PROFESSIONAL SUMMARY

AI-native product builder, not just a PM. I ship production **AI agents and automation for operational teams** myself: **LLM and RAG pipelines, autonomous agents, evals, multimodal models and voice assistants**. Co-founded and built an **AI-powered brand-creator collaboration platform 0 to 1** as a side project, owning product, design and all engineering. **9 years** across **B2B SaaS, workforce marketplaces and consumer platforms**, designing **human-in-the-loop agents** and taking AI from **pilot to adoption** across UK, US and India. India's Top 30 Under 30.

SKILLS

Product & Strategy: 0-to-1 product building · Build-not-brief execution · Workflow discovery & shadowing · Agentic automation roadmaps · Human-in-the-loop agent design · AI pilot-to-adoption · Internal tools for ops teams
Analytics & AI Quality: AI Evaluation (eval datasets, human-labelled benchmarks, prompt iteration) · Relevance & quality frameworks · Productivity & throughput metrics · Agent adoption metrics · Holdout testing · A/B Testing · SQL · Mixpanel
Execution & Technical: RAG Workflows · LLM APIs (OpenAI, Anthropic, Gemini) · Gemini on Vertex AI (GCP) · AI Agents & Tool Use · Prompt Engineering · Conversational UX · Voice AI (Twilio, ElevenLabs) · MCP · A2A Protocols · Claude Code · Cursor · Next.js · Supabase · Webhooks · Data Pipelines · JIRA · Figma
Domains: Agentic Systems · Operational Automation · Workforce Management & Staffing Marketplaces · Creator Marketplaces · eCommerce & D2C · Enterprise B2B SaaS · Payments & Compliance

RELEVANT EXPERIENCE

Growth Lead - D2C Mens Health
Man Matters (Mosaic Wellness), India | *Apr 2026 - Present*
Sole PM for a D2C men's health subscription brand. **Shipped 6 AI systems into production solo**, with no data team, including agents and internal tools for the doctor and customer care teams.

- Built a **consultation-call intelligence system** for the doctor team end to end: AssemblyAI transcription and Claude scoring every call across 5 dimensions, cross-referenced against 30-day reorders.
- **Owned AI quality hands-on:** iterated scoring prompts on real calls, built a **human-labelled eval set** and set the agreement bar Claude had to clear against human review before scores were used in doctor performance reviews.
- Found 3 doctor behaviours (shedding warning, tapering timeline, 30-day follow-up) that lift **reorder rate by 14%** (calls with vs without); shipped a doctor protocol and weekly compliance dashboard used in performance reviews.
- Lifted **hair quiz-to-purchase conversion by 15%** (before vs after) through funnel experiments, and launched blood test bookings, scaling them to **50 bookings per day** (from zero at launch).
- Built an **AI training simulator for the customer care team**: voice personas built from past customer data role-play real conversations, and post-call feedback flags skill gaps to train.
- Designed and shipped **2 production voice agents** solo (delivery onboarding and day-35 retention) with clear human-handoff rules, driving **+10% reorder rate** (agent cohort vs holdout control).
- Built a **multimodal hair-progress pipeline on Gemini** that scores monthly photos and auto-triggers outreach at **73% ROAS vs 59%** (vs other campaigns), plus a **Vertex AI (GCP)** model staging hair loss at **90% accuracy**.
- Shipped an **AI Q&A agent** and moved on-site search from keyword to **intent-based retrieval**, lifting **search-to-conversion by 1.5%** (intent vs keyword search).

Senior Product Manager - WFM SaaS Platform
Indeed, UK | *July 2022 - Aug 2025*
Owned product strategy and execution for Indeed Flex, a workforce staffing marketplace, across Messaging, Support, Time & Attendance, Ratings and Compliance, building AI workflows that cut manual work for clients and ops in the UK and US.

- **Architected and shipped Alma, an AI Copilot agent** using LLMs plus RAG over shift and worker data to run multi-step scheduling, availability checks and rota updates, **reducing manual effort by 40%** on targeted tasks (before vs after).
- **Designed how Alma behaves:** which tools it calls, when it acts versus asks for confirmation, entity resolution for ambiguous requests, and the **AI evaluation framework** it had to pass before changing any rota.
- Reduced Salesforce support tickets by **45%**, saving Account Managers **248+ hours/month** (before vs after), by launching self-serve resolution flows that took repetitive work off the client operations team.
- Launched **1:1 and Group Messaging** for clients and internal workforces, increasing message volume by **65%** (after vs before launch) and eliminating reliance on external tools.
- Designed **AI messaging enhancements** (conversation summarisation, smart replies, urgent action triggers) so clients could act on urgent worker issues without waiting on Account Managers.

- Ran **discovery workshops with OCS, a £400M enterprise client**, and its supplying agencies to map manual certification workflows end to end, then delivered a partner integration syncing real-time worker certification data.
- **Redesigned the clock-in/out flow** with mandatory geolocation and a phased rollout, improving accuracy by **30% (UK)** and **19% (US)** (before vs after) and cutting payroll disputes and manual corrections.
- Increased shift feedback adoption from **37% to 60%** in the UK by launching a scalable ratings system, improving **worker-to-job matching** and client repeat usage.
- **Delivered time and pay compliance features** that enabled **4,300+ sick pay hours** to be withdrawn and raised instant pay eligibility by **4%**.
- Drove team-wide adoption of **AI-native prototyping** (Cursor, Claude Code, V0) across the product org, cutting documentation time by **25%** (time per brief, before vs after).
- **Built the first client-facing API**, enabling real-time partner data sync via webhooks and data pipelines.
- Mentored junior PMs and established a **client research framework** adopted across the product team to standardise discovery, workflow and pain-point mapping, and opportunity sizing.

Senior Product Manager - Growth & Retention
Health & Glow, India | *Apr 2019 - May 2022*
Owned growth, engagement and internal tooling for India's leading beauty retail chain (165+ stores, 3M+ users).

- Delivered **ARR growth of +152%** over 3 years by streamlining **content and order management tools for 60+ internal staff** and improving fulfilment accuracy across 165+ stores.
- Ran in-store discovery with beauty advisors to map how they guide customers, then rebuilt it digitally as an **AI skin and hair diagnostic** (selfie, lifestyle questions, vision API), lifting **repurchase rate by 15%** (before vs after).
- Introduced **AI-powered personalisation** for recommendations, lifting **average basket value by 17%** (mobile and web).
- Launched **omnichannel features** and a **staff digital assistant app** (same-day delivery, click & collect, self-checkout), reducing drop-off by **10%** across key journeys.
- Drove conversion uplift through structured **A/B testing** of pricing displays, landing pages and bundles.

0-TO-1 PRODUCT BUILD

AI-Powered Brand-Creator Collaboration Platform
Guapd (guapd.com), India | *Co-founded side project; co-founders now run it day to day*
Co-founded and built the full product suite where brands and creators run collaborations end to end, owning strategy, product, design and all engineering AI-first with Claude Code (**950+ commits, 90 pages, 7 user roles**).

- Sized India's **₹3,000 to 3,500 crore** influencer market (industry estimates) and mapped **15+ competitors**, finding the gap was deal workflow and trust, not discovery; set the wedge and commission model.
- Shipped **3 products on 1 platform**: brand (AI discovery, multi-creator campaigns), creator (verified storefronts, invoicing) and ops (4-tier vetting, outreach, managed shoots with P&L).
- Built a **7-stage deal lifecycle** from offer to payment, plus **Claude-powered search** that turns a plain-language brief into structured filters, with ranking in code so match reasons are never invented.
- Integrated **9 services** incl. the **Instagram API (Meta App Review approved)** and Razorpay, secured by **84 access policies**, 81 database tables, an audit log on every deal and 38 automated test scripts.
- Launched to **1,500 sign-ups** (first 7 days after launch), with 1 brand running a **70-deliverable campaign**, and tracked 28 product events in PostHog to steer the roadmap.
- Repositioned to beauty, fashion and D2C with managed content shoots when brands proved slow to leave agencies, designing a **2-sided money model** (brands pay Guapd, Guapd pays creators).

AI PROJECTS & CERTIFICATIONS

- **PM Workflow Agents (Freelance, Ethos Nexus):** Built a Slack-native, agent-based PM Inbox that classifies and routes product requests across Gmail, Slack and Granola. Shipped and in paid use.
- **MCP Workspace Automation Agent:** Single-prompt actions orchestrated across Jira, Slack and Notion via MCP, with an agentic tool-calling loop and real-time activity logging.
- **Voice AI Assistant (phone-callable):** Twilio plus ElevenLabs with RAG memory, entity resolution and smart human handoff; handles routine support calls autonomously.
- **Autonomous Job Search Agent:** Matches roles from job boards semantically and sends alerts; built on MCP and A2A.
- **Other:** AI Product Management (Coursera) · ChatGPT API Systems (DeepLearning.AI) · Generative AI (Google Cloud)

EDUCATION

- **M.Tech & B.Tech**, Ocean Engineering & Naval Architecture - Indian Institute of Technology (IIT) Kharagpur
